GENERAL KNOWLEDGE / PLAINDECK DEMO

How Learning Sticks

A practical loop for turning exposure into durable, usable memory.

A FIVE-SLIDE FIELD GUIDE

CREATED WITH PLAINDECK CLI · RENDERED FROM READABLE JSON

01

Reading creates familiarity. Retrieval creates a usable memory.

If the page is always open, recognition can feel like knowledge. Close it and try to reconstruct the idea.

Three moves make learning durable

01

SPACE
Return later

02

RETRIEVE
Answer first

03

CONNECT
Explain why

SHORT ATTEMPTS • USEFUL DIFFICULTY • FAST FEEDBACK

Useful difficulty makes you reconstruct

One long pass can feel fluent. Short, spaced attempts reveal what is actually available from memory.

Let some forgetting happen—then reconstruct. Each successful return makes the route easier to find.

1 → 3

one exposure becomes repeated retrieval

Try to remember.
Use feedback to correct the gap.
Return later.

Question · retrieve · check · schedule the next attempt
